Job	N/A	
Description	10 x 20 inline rental	

Step 1: Start construction 3" from outside edge of carpet and as far back as the included base plates will allow. Position panel 1 on top of the supplied base plate and then continue locking the frames together as shown below. (Note: frames are labeled to show number and orientation to the back of the booth)

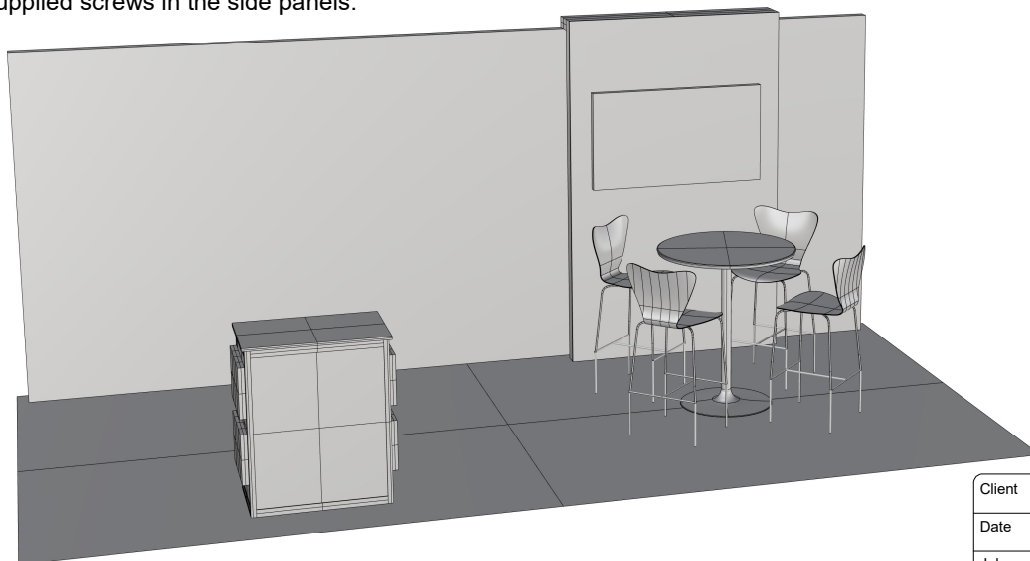

Step 2: Position and attach the top laminate panel as shown using the supplied 3" long hardware. (blue tape on the edge of the frames show positioning).

Step 5: Install graphic into supplied SEG track. (NOTE: leave bottom of graphic uninstalled so wiring can be ran for the monitor).

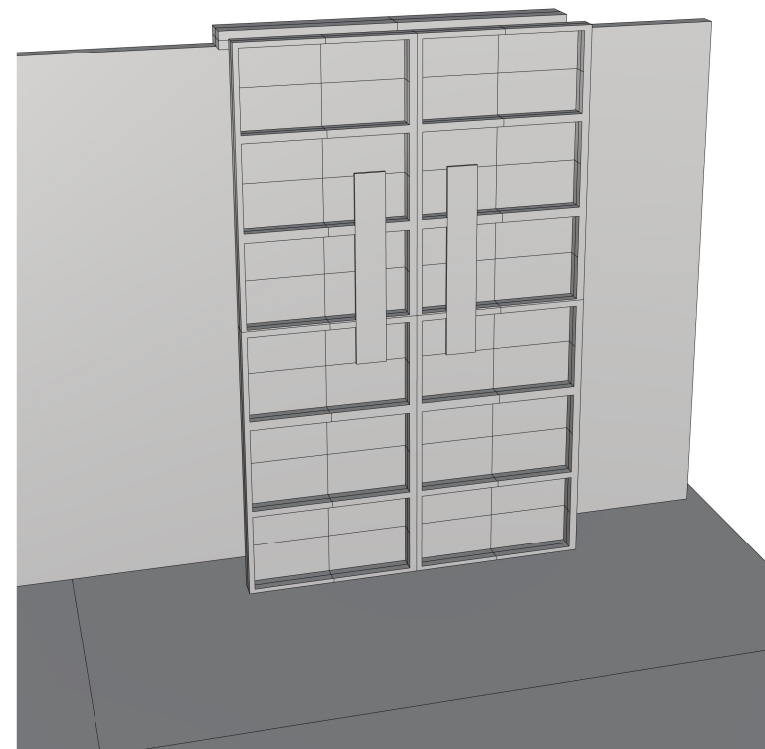

Step 6: Screw wall mount for TV into position with supplied hardware and install TV.

Step 7: Assemble reception counter per instructions and install literature racks onto the supplied screws in the side panels.

Step 3: Install back wall graphic.

Step 4: Locate the left and right accent SEG panel and position together with the supplied 2" long hardware while the panels are on the floor, face up. Once together carefully stand up and put into position and attach to the canopy component with the supplied 2" hardware. Make sure to connect accent lights to the installed power strip and run power strip cord through the back large graphic and connect to the show electrical drop. (NOTE: run supplied HDMI cable as well)

Step 1:

Install the bottom Qty. 2 crossbars and the front top crossbar (30" w) making sure to keep them flush at the top and bottom to ensure proper fit of the sliding doors. (NOTE: raising the bottom bar will help secure the sliding doors for better functionality)

Step 2:

Insert the sintra locking doors in the groove (gently bend doors to insert them into the track)

Step 3:

Position the top and set into position
